About ALON

ALON (Always On) is a personal AI assistant for the entire home-buying journey. Built by TryThat.ai, ALON guides buyers through all 8 stages of property acquisition — from initial search to final possession — acting exclusively in the buyer's interest.

Unlike traditional real estate platforms that serve listings, ALON serves *buyers*. It never shares your contact without permission, provides complete journey support, and always works for you — never the builder or agent.

The design language reflects **Trust Architecture** — a visual system built on deep navy foundations and warm terracotta accents that convey institutional reliability with approachable warmth.

Design Principles

Trust First

Every visual choice reinforces trust. Navy = institutional confidence, Terracotta = warmth.

Flat Over Skeuomorphic

Subtle elevation only. On blue bg: border + opacity, no shadows.

One CTA Rule

One primary action per screen. Secondary = outlined/ghost for hierarchy.

Active = Border + Fill

Selected states: both border color AND background fill change. Never just color.
